Academic Program and Course Description Guide

the introduction:

The educational program is a coordinated and organized package of courses that include procedures and experiences organized in the form of study vocabulary, the main purpose of which is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs, such as the external examiner program.

The academic program description provides a brief summary of the main features of the program and its courses, indicating the skills that students are working to acquire based on the objectives of the academic program. The importance of this description is evident because it represents the cornerstone in obtaining program accreditation, and the teaching staff participates in writing it under the supervision of the scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the new developments and changes in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, semester) in addition to adopting the description of the academic program circulated under the letter of the

١

Department of Studies T M.3/2906 on 5/3/2023 regarding programmes that rely on the Bologna Process as the basis for their work.

In this regard, we cannot but emphasize the importance of writing a description of academic programs and courses to ensure the smooth running of the educational process.

Concepts and terms:

Academic Program Description: The academic program description provides a concise summary of its vision, mission and objectives, including a precise description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a concise summary of the main characteristics of the course and the learning outcomes expected of the student, demonstrating whether the student has made the most of the learning opportunities available. It is derived from the programme description.

<u>Program vision:</u> An ambitious vision for the future of the academic program to be an advanced, inspiring, motivating, realistic and applicable program.

<u>Program message:</u>It briefly explains the objectives and the activities required to achieve them, and it also identifies the paths and directions of the programme's development.

<u>Program objectives:</u> These are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum structure:</u> All courses/subjects included in the academic program according to the approved learning system (semester, year, Bologna track) whether they are required (ministry, university, college and scientific department) with the number of academic units.

<u>Learning outcomes</u>: A compatible set of knowledge, skills and values acquired by the student after successfully completing the academic program. The learning outcomes for each course must be determined in a way that achieves the program's objectives.

<u>Teaching and learning strategies</u>: It is the strategies used by the faculty member to develop the teaching and learning of the student and they are plans that are followed to reach the learning objectives. That is, it describes all the classroom and extracurricular activities to achieve the learning outcomes of the program.

\. Program vision

The department aspires for the college to occupy a leading and distinguished scientific position among colleges, and for the Arabic language to be the identity of its speakers, as it is the important and common link that unites them and distinguishes them from the rest of the peoples of the world. The department's vision is also based on developing a scientific basis for understanding language and literature in a way that is consistent with contemporary philosophies and directing it in a way that reveals the uniqueness of the Arabic language and its mechanism of action in the field of critical and stylistic studies, phonetic and grammatical studies and their related matters. From this standpoint, the department seeks to serve the Arabic language and spread its sciences in all parts of the world, as it is the origin and vessel of all sciences, and no science exists without it, so that it remains alive on tongues as long as there is a pen that writes and a tongue that speaks.

7. Program message

The department seeks to graduate generations who are proficient in the Arabic language. The department also qualifies an educated cadre who is aware of the importance of the language and its uniqueness among the languages of the world and opens up horizons of interaction with society and conveying the noble values that the language carries, proud of its authentic Arab-Islamic heritage, which must possess the scientific and research skills that enable it to contribute effectively to the renaissance of the nation and restore its ancient glory. The department also seeks to build students with high morals and integrity based on authentic knowledge and science, and to stay far away from reprehensible extremism and blind fanaticism in all its dimensions. Above all, calling to God with insight, wisdom and good advice.

^τ. Program objectives

Preparing a righteous and faithful generation, deepening cultural awareness and linking it to the intellectual heritage of the Arab nation and its glorious history.

Building bridges between the Ministry of Education and the colleges of education in the country by preparing Arabic language teachers scientifically and professionally.

To promote the Arabic language and preserve it in a way that serves the safety of this ancient language and its speakers in a scientific, thoughtful and sound

manner.

Seeking to consolidate the pillars of this language and deepen its great role in unifying the Arabs and considering it a prominent element of their national unity.

Working on developing cognitive and behavioral skills within the framework of the Arabic language in order to enable them to perform the tasks required of them in society.

Statement of the living human horizon of this language among the contemporary languages of the world

Enabling the sons of the Arab nation to understand well what they read and write.

4. Programmatic accreditation

Adoption of global comprehensive education quality standards and the Association of Arab Universities standards in the field of education quality

o. Other external influences

Sunni Endowment Diwan/Ministry of Higher Education/Ministry of Education

A. Expected learning outcomes of the program

- A Knowledge
- A-1- The graduate should know the components of Arabic speech, its parts and words.
- A-2. Remember the information you have studied and recall it when needed.
- A -3. Understanding information and explanations that explain some linguistic and literary phenomena.
- A-4 Applying everything students have learned and studied in their practical life.
- A-5. Analyze the problem or topic that consists of different parts and study it.
- A-6. Constructing sentence parts to know the meaning of each part separately, while reviewing literary concepts and poetic purposes.
- A-7. Qualifying students to gain knowledge and understanding of grammar.
- A-8. Qualifying students to gain knowledge and understanding of morphology.
- A-9. Qualifying students to acquire knowledge and understanding of spelling and expression.
- A-10. Qualifying students to gain knowledge and understanding of literature.
- A-11. Qualifying students to acquire knowledge and understanding of the basic standards of Arabic language sciences.
- A-12 Linking the text to its external environment
- A-13 Text analysis and explanation

- B Program specific skill objectives
- **B-1 Pronounce sounds correctly**
- B -2 Writing letters and composing words and sentences correctly
- B -3. Delivering a speech about the Arabic language as the language of the Qur'an, literature, heritage and the present.
- for-4 Introducing the student to the importance of the Arabic language from a scientific and practical perspective.
- for-5 Explain in an attractive way
- for-5- Attend to the recipient to ensure that he/she does not miss the lecture, even if it is temporary.
- for-6 Exam after finishing the lecture, and answer by hand to ensure review of the lecture
- C Emotional and value goals:
- C-1. Make the student interested in studying and understanding the Arabic language.
- C-2 The student realizes that the Arabic language is one of the living languages.
- C-3 Make the student love the Arabic language
- C-4 Rejecting any attempt to belittle the Arabic language and detract from its purpose of communication.

9. Teaching and learning strategies

- 1-The lecture
- 2- Interrogation (question and answer)
- 3- Standard (rule or law or whole) then examples.
- 4- Inductive: (examples) then arrives at the rule or law.
- 5- Dialogue and discussion
- 6- Conceptual mapping method
- 7- Computer-based presentations (data show)
- 8- Cooperative learning
- 9- Problem solving
- 10- Brainstorming

- 11- Investigation and (research)
- 12- Collective repetition
- 13- Story style
- 14- Seminar style
- 15- Possible electronic lecture or workshop, e-learning.
- 16- Raising various questions through which information can retrieved.

\'. Evaluation methods

Achievement tests of various types:

- 1- Conducting daily, monthly and quarterly tests with diverse questions.
- 2-Quick exams
- 3- Writing scientific reports.
- 4- Homework.
- 5- Committees to discuss graduation research projects for fourth-year female students.
- 6- Evaluation of training in middle and secondary schools.
- 7 social networking sites and educational sites in the field of the Arabic language.

Professional development

Orientation of new faculty members

- 1- Participation in qualifying courses
- 2- Participation in development courses
- 3- Participation in teaching methods courses

Professional development for faculty members

- 1- Employing new and appropriate teaching methods.
- 2- Employing new means that serve the information acquired by the student.
- 3- Make the curriculum flexible to suit all levels of students.
- 4- Employing the skills necessary for the educational process to obtain the necessary

information.

- 5- The teacher should be a good role model and ideal image for his students to follow.
- 6- Participation in leadership and management courses.
- 7- Participation in development courses
- 8- Participation in general quality courses
- 9- Participation in conferences and seminars
- 10- Publishing in local and international magazines.

17. Acceptance Criteria

First: Admission requirements to the college:

- 1- Approving the admission requirements for students according to the regulations of the Ministry of Higher Education and Scientific Research (Central Admission)
- 2- The student must successfully pass a special test or personal interview as determined by the college or university council.
- 3- The student must be medically fit for the specialization he is applying for.

Second: Admission requirements to the scientific department

- 1- The student chooses his desire from more than one desire arranged according to preference.
- 2- High school acceptance rate
- 3- The average of the course in which the student wishes to study.
- 4- The capacity of the scientific department

1 The most important sources of information about the program

- 1- Ministerial instructions
- 2- Sectoral Committee for Curricula for Faculties of Education

Program development plan

View the latest modern sources and modern translations

Relying on the mothers of modern books and specialized books

Use of means of displaying and explaining the vocabulary of the educational material

Choosing the most suitable and easiest to use electronic platforms

Use of direct measures (written and oral tests, integrated experience, achievement files,

performance evaluation, observation, and projects)
Use indirect measures (articles or questionnaires to survey the opinions of students, graduates or employers, and focus groups)

Course description for the first stage

Course Description / Computer 1- Course name Computer / First stage 2-Course code 3-Semester/Year 2024 4- Date of preparation of this description 10/1/2024 5- Available forms of attendance Mandatory attendance / Absence attendance 6-Number of study hours (total) / Number of units (total) Hours: (28 hours) Units: (56 units) 7- Name of the course administrator (if more than one name is mentioned) Name: M. Imad Akleh Shukri Email:albazi.emad@gmail.com 8- Course objectives Course objectives: Training the student and developing his scientific abilities to

9-Teaching and learning strategies

information technology.

benefit from the computer. Providing the student with creative mental abilities and helping him to think logically, inductively and deductively and developing his abilities to solve problems. Strengthening the desire factor towards the computer and its applications and providing the student with positive tendencies aimed at

Strategy: This lesson aims to identify modern methods of teaching computer science according to an integrated set of strategies as follows:

AFirst: Private Education Strategy The computer is considered a private teacher for the learner, as it is the one who tests the learner and monitors his mark. This strategy is used in manyStudy materialsThe decision.

Second: Training and practice strategyThe aim and purpose of these programs is to create opportunities and a space for the educated person to apply and train on the matters, knowledge and skills that he has learned before.

Third: Simulation strategy, This type of program depends on and is based on conducting a direct dialogue between the learner and the computer, in order to teach a prescribed subject.

Fourth: Dialogue Strategy This type of program depends on and is based on conducting a direct dialogue between the learner and the computer, in order to teach a prescribed subject.

Fifth: Problem-solving strategy This method is derived from theories <u>artificial intelligence</u> It depends on the computer, because it represents the medium through which the program in which the learner participates is presented and presented, as this method is based on developing and advancing the learner's ability from an innovative and mental perspective.

Sixth: Educational games strategy They are logical games that are characterized by an element of suspense and entertainment and are based on stimulating the motivation of the learner, as the goal and purpose of this style is to create an educational atmosphere in which academic achievement and entertainment are intertwined, in order to generate excitement that works to attract and motivate the learner towards learning.

8- Course objectives

Course objectives: The teaching of freedom and human rights aims to: To increase the student's knowledge of the theoretical understanding and historical development of the subject of freedom, human rights and democracy, to develop the student's analytical and critical skills regarding the reality and future of freedom, human rights and democracy, to train the student on the importance of active participation in aspects of public life such as enhancing respect for the principles of general human rights and active participation in political and cultural life, to enable students to understand the importance of education and its role in spreading the culture of freedom, human rights and democracy in building a civilized society based on good governance, the most important components of which are belief in human rights and education on them and active participation in governance through free and fair elections.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities represented by seminars, discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning tools for clarification, for example: the blackboard, the display screen, and clippings, and urging students to visit libraries and how to access information in a short time.

Hours: (28 hours) Units: (56 units)

7- Name of the course administrator (if more than one name is mentioned)

Name: Asst. Prof. Dr. Adel Marouf Lafta Email: adilmaarouf@imamaladham.edu.iq

8- Course objectives

Course objectives: The teaching of jurisprudence aims to enlighten students about the importance of the scientific aspect of religion, represented in worship, while emphasizing that it is an integral part of the faith and acquaints students with all acts of worship, their conditions and rulings, and everything related to them, to make the servant knowledgeable, aware and conscious of his religion and its rulings so that students can train to practice worship and get used to performing it, so that it becomes part of their behavior and a duty that they feel the necessity of performing whenever the time comes. The jurisprudence lesson also contributes to students acquiring many virtues and manners such as order, obedience, cleanliness, good appearance, nobility of soul, enduring hardships and compassion for others.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning tools for clarification, for example: the blackboard, the display screen, and clippings, and urging students to visit libraries and how to access information in a short time.

Hours: (56 hours) Units: (84 units)

7- Name of the course administrator (if more than one name is mentioned)

Name: Asst. Prof. Dr. Adel Marouf Lafta Email: adilmaarouf@imamaladham.edu.iq

8- Course objectives

Course objectives: The teaching of morphology aims to enlighten students about the importance of the morphological aspect in Arabic linguistics and the change that occurs in the word. Morphology is the most important and dangerous of the Arabic sciences, and it is the most deserving of our attention, and our devotion to studying it, and our sparing no effort in obtaining it, because it enters into the core of Arabic words, and is the standard and the scale, and its knowledge alone is the basis for controlling the forms and knowing their diminutives and their relation, and it is a face alone in which the contemplator stands on what befalls the words of weakness, substitution or assimilation, and from it alone he knows what is regular in Arabic and what is rare and what is exceptional from the plurals, sources and derivatives, and by observing its rules the vocabulary of speech is free from violating the analogy that disrupts eloquence and with it invalidates the eloquence of the speakers.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning tools for clarification, for example: the blackboard, the display screen, and clippings, and urging students to visit libraries and how to access information in a short time.

6-Number of study hours (total) / Number of units (total)

Hours: (28 hours) Units: (28 units)

7- Name of the course administrator (if more than one name is mentioned)

Name: M. Abdel Moneim Shaker Abdullah

Email:ambaghdad@gmail.com

8- Course objectives

Course objectives: The aim of teaching English is to enable students to practice the English language correctly, practice how to formulate sentences and converse with each other, practice some grammar rules and memorize some vocabulary, and how to pronounce it correctly, to enhance their linguistic ability.

9-Teaching and learning strategies

Strategy: Working on developing students' skills and directing them in an academic and scientific manner by enhancing confidence in individual and collective skills using scientific means directed towards working to achieve the desired goals while noting the differences present among students, in addition to using learning tools for clarification, for example: the blackboard and the display screen.

| Annual course | ¹ . Chapter/Year |
| 60 hours | V. Number of study hours (total) |
| 22/2/2024 | Date this description was prepared |

.Course objectives

- 1- The course aims to introduce the student to the importance of reciting the Holy Quran and learning its rules.
- 7- Defining the rules of recitation for the student, in terms of definition, explaining its merit, its fruit, its author, and its ruling.
- ν- Introducing the student to the rules of recitation with all its details, whether stopping or connecting.
- E- The student should master and control recitation, and be aware of making obvious or hidden mistakes when reciting the recitation.
- A statement on the merit of the scholars of the nation in preserving this religion and everything related to the Book of their Lord, even in the amount of chants, extensions, and other things.

.Learning outcomes, teaching and learning methods and assessment

A- Knowledge and understanding

- A1- Enabling the student to understand the rules of recitation theoretically.
- A2- Enabling the student to be familiar with the details of each rule of recitation.
- A3- Preparing him to work in educational and religious institutions.

B- Subject-specific skills

- for1 The student should be able to recite the Holy Quran correctly, free of hidden and obvious mistakes.
- for2- The student should be able to teach others the correct pronunciation of recitation.

for3 - The student should be able to teach and acquire the necessary skills in teaching and education.

C- Emotional goals:

- G1- Raising the student to love the Qur'an and be proud of his faith and religion.
- G2- Recognizing the value and beauty of the Holy Quran, and that it is suitable for all times and places.
 - G3- Providing the student with the skill of correct pronunciation to recite the Holy Quran and perform its message correctly.

| Name: Asst. Prof. Dr. Hussein Rayhan Abdul |
| Gmail:dr.hussien.alzawbaee@imamaladham.edu.iq |
| 8- Course objectives |
| Course objectives: Introducing students to the literary heritage in its various eras and providing them with its moral, social and artistic values, which will be part of their |
| intellectual and cultural formation. |
| Developing literary taste and enabling students to perceive aspects of beauty and harmony in |
| literary texts, introducing them to the sources of this beauty, and teaching them to analyze |

texts.

Developing students' ability to perform well, deliver quality speech, and represent meanings. Increasing students' ability to understand literary texts, extract meanings from words, perceive their beauty, appreciate, analyze and criticize them, and enable students to make literary comparisons and issue judgments with honesty and objectivity.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning tools for clarification, for example: the blackboard, the display screen, and clippings, and urging students to visit libraries and how to access information in a short time.

5- Available forms of attendance

Mandatory attendance / Absence attendance

6-Number of study hours (total) / Number of units (total)

Hours: (28 hours) Units: (56 units)

7- Name of the course administrator (if more than one name is mentioned)

Name: M. Imad Akleh Shukri

Email:albazi.emad@gmail.com

8- Course objectives

Course objectives: Training the student and developing his scientific abilities to benefit from the computer. Providing the student with creative mental abilities and helping him to think logically, inductively and deductively and developing his abilities to solve problems. Strengthening the desire factor towards the computer and its applications and providing the student with positive tendencies aimed at information technology

9-Teaching and learning strategies

Strategy: This lesson aims to identify modern methods of teaching computer science according to an integrated set of strategies as follows:

AFirst: Private Education Strategy The computer is considered a private teacher for the learner, as it is the one who tests the learner and monitors his mark. This strategy is used in many Study materials The decision.

Second: Training and practice strategy The aim and purpose of these programs is to create opportunities and a space for the educated person to apply and train on the matters, knowledge and skills that he has learned before.

Third: Simulation strategy, This type of program depends on and is based on

conducting a direct dialogue between the learner and the computer, in order to teach a prescribed subject.

Fourth: Dialogue Strategy This type of program depends on and is based on conducting a direct dialogue between the learner and the computer, in order to teach a prescribed subject.

Fifth: Problem-solving strategy This method is derived from theories artificial intelligence It depends on the computer, because it represents the medium through which the program in which the learner participates is presented and presented, as this method is based on developing and advancing the learner's ability from an innovative and mental perspective.

Sixth: Educational games strategy They are logical games that are characterized by an element of suspense and entertainment and are based on stimulating the motivation of the learner, as the goal and purpose of this style is to create an educational atmosphere in which academic achievement and entertainment are intertwined, in order to generate excitement that works to attract and motivate the learner towards learning.

8- Course objectives

Course objectives:

- The student should know how Muslim poets harnessed their poetry to serve the Islamic call, and the change that occurred in literature in the styles of poetry in terms of words and meanings, and to be familiar with them, and to be informed about the poets of the early days of Islam and what they brought.
- That the student becomes familiar with the sources of Arabic literature in general and Islamic literature in particular.
- And to connect him with his Creator, the true religion, and Arabic literature, and make him feel his responsibility towards this religion, and establish him on virtuous values and clarify correct perceptions, as literature is the record of Arabs and Muslims.
- Helping him stand up to Western literature, its atheistic philosophies, and intellectual invasion in general, and confronting the enemies of the Muslim nation, who are lurking in the dark about it.
- Sharpening and stimulating spirits, and reminding people of the glory of Islam.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning methods for clarification, for example: the blackboard and urging students to visit libraries and how to access information in a short time.

Name: Asst. Prof. Dr. Adel Marouf Lafta Email: adilmaarouf@imamaladham.edu.iq

8- Course objectives

Course objectives: The teaching of morphology aims to enlighten students about the importance of the morphological aspect in Arabic linguistics and the change that occurs in the word. Morphology is the most important and dangerous of the Arabic sciences, and it is the most deserving of our attention, and our devotion to studying it, and our sparing no effort in obtaining it, because it enters into the core of Arabic words, and is the standard and the scale, and its knowledge alone is the basis for controlling the forms and knowing their diminutives and their relation, and it is a face alone in which the contemplator stands on what befalls the words of weakness, substitution or assimilation, and from it alone he knows what is regular in Arabic and what is rare and what is exceptional from the plurals, sources and derivatives, and by observing its rules the vocabulary of speech is free from violating the analogy that disrupts eloquence and with it invalidates the eloquence of the speakers.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing

confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning tools for clarification, for example: the blackboard, the display screen, and clippings, and urging students to visit libraries and how to access information in a short time.

| Evaluation method | Learning method | Unit name and topic | Required educational | Watche s | The week |

6-Number of study hours (total) / Number of units (total)

Hours: (60 hours)

7- Name of the course administrator (if more than one name is mentioned)

Name: Asst. Prof. Dr. Waad Sabbar Mohammed Email: dr. waadsabar 2@imamaladham.edu.iq

8- Course objectives

Course objectives:

General objectives

- Identifying educational fields and their sources
- Knowing the relationship between education and other sciences such as psychology and sociology
- Keeping up with the latest efforts of educational scientists, whether experimental or theoretical.
- Tracking the stages of educational development

Cognitive objectives:

- Expanding the student's horizons in education
- Comparison between the old curriculum in education and the modern curriculum
- Islamic education is distinguished by cognitive characteristics, as the sources of this education are the Holy Qur'an and the pure Sunnah.

9-Teaching and learning strategies

Strategy:

The lecture

Interrogation (question and answer)

Dialogue and discussion

Problem solving

| Evaluation method | Learning | Unit name and topic | Required | Watche | The |

Email:dr.ahmedsamrra@gmail.com

8- Course objectives

Course objectives: Preserving the rules of the abstract classical language on the one hand and forming the correct linguistic ability that achieves its stability on the other hand, as it is a means of preserving the Arabic language and a part of the nation's history, in addition to helping him read the Qur'an correctly and protecting it from error and distortion, as it increases the understanding of the meanings contained in the correct form and is considered a valuable tool in interpreting the words of God Almighty.

9-Teaching and learning strategies

Strategy: This lesson aims to identify modern methods for teaching grammar in academic achievement among general education students. Among these strategies are the text strategy, then the problem-solving strategy, the investigation strategy, along with the dialogue and discussion strategy, in addition to using the concept maps strategy based on the descriptive analytical approach in collecting, processing, classifying and analyzing the rules, while maintaining that the text strategy is the best strategy for achieving the goals set for grammar rules, and that the problem-solving strategy allows students to be guided by it in their work, which increases their academic achievement in grammar. The investigation strategy makes learning revolve around the student and has a positive impact on academic achievement in grammar. The concept maps strategy works to focus learners and guide them to evaluate their ideas, which contributes to increasing their academic achievement in grammar.

8- Course objectives

Course objectives: The teaching of measurement and evaluation aims to teach students the measurement process in the educational aspect, represented by (tests), how to conduct these tests, what their types are, and then conduct the (evaluation) process after arriving at the measurement results by addressing the weaknesses and strengthening the strengths.

9-Teaching and learning strategies

Strategy:Preparing (teachers) capable of formulating tests in a scientific manner that is consistent with the students' ability to follow modern scientific methods and reach the results of those tests and the ability to interpret them, which represent the results of the teaching process, and then identifying the negative results and ways to address them and enhance the positive results.

| Evaluation method | Learning method | Unit name and topic | Required educational outcomes | Watche s | The week |
|-----------------------|------------------------------------|---|-------------------------------|-------------|---------------|

The grade is distributed from 100 according to the tasks assigned to the student, such as

5- Available forms of attendance

Mandatory attendance

6-Number of study hours (total) / Number of units (total)

Hours: (56) / Units (112)

7- Name of the course administrator

Name: Prof. Dr. Rana Hadi Saleh

Email:rana.hadi@imamaladham.edu.iq

8- Course objectives

- The student should know the nature of linguistics, its branches and fields.
- To be able to compare and balance research methods in linguistics.
- To understand what the ancient Arabs brought and what the West or moderns brought and to compare between them.
- To know the levels of language and its applications.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning methods for clarification, for example: the blackboard and urging students to visit libraries and how to access information in a short time.

| 10 Course structur | | | | | |
|------------------------|-----------------|---|-------------------------------|-------------|---------------|
| Evaluation method | Learning method | Unit name and topic | Required educational outcomes | Watche s | The week |
| Written and oral tests | Discussion | Definition of linguistics and jurisprudence of language - Its topics, features and dimensions | theoretical | 2 | the first |
| Written and oral tests | Discussion | The relationship of linguistics to other sciences | theoretical | 2 | the second |
| Written and oral tests | Discussion | Study methods in ancient times - The Greek approach and its influence on Arabic linguistic studies - The Arabic descriptive approach - Comparing the Arabic and Greek curriculum | theoretical | 2 | the third |

| Written and oral tests | Discussion | Standard curriculumComparing the standard and | theoretical | 2 | Fourth |
|------------------------|------------|---|-------------|---|----------------|
| Written and oral tests | Discussion | descriptive approach General review of the above | theoretical | 2 | T2°641. |
| | | | | | Fifth |
| Written and oral tests | Discussion | Modern approaches to language study The descriptive approach, its emergence and foundations Its development and most famous figures | theoretical | 2 | Sixth |
| Written and oral tests | Discussion | Structuralist school - Generative Transformational School - School of molds | theoretical | 2 | Seventh |
| Written and oral tests | Discussion | Historical approachComparative approach | theoretical | 2 | The eighth |
| Written and oral tests | Discussion | ancient phonetic studies In India, Greece and Rome The Arabs connected it to the Qur'an. | theoretical | 2 | Ninth |
| Written and oral tests | Discussion | Speech organsSound outlets and their characteristics | theoretical | 2 | tenth |
| Written and oral tests | Discussion | Arabic sounds betweenstability and changeAudio clips in Khalil shows | theoretical | 2 | eleventh |
| Written and oral tests | Discussion | Modern phonetic studiesSpeech organsSound outlets and their characteristics | theoretical | 2 | twelfth |
| Written and oral tests | Discussion | special phoneticsPhoneme and syllableStress and intonation | theoretical | 2 | thirteen th |
| Written and oral tests | Discussion | Linguistic structures and phonetic systems - Most and least sounds - Brotherly and hostile voices - Weaving systems according to the exits | theoretical | 2 | fourteen th |
| Written and oral tests | Discussion | The morphological aspect - Introductions and terms - Independence of morphology from grammar among Arabs | theoretical | 2 | fifteenth |
| Written and oral tests | Discussion | Exchange research - Morphological analysis and its units - Morphological | theoretical | 2 | Sixteent h |

| | | formulas | | | |
|------------------------|------------|---|-------------|---|--------------------|
| Written and oral tests | Discussion | - Morphological meanings number The person | theoretical | 2 | sevente nth |
| Written and oral tests | Discussion | Sex Appointment | theoretical | 2 | eighteen th |

Course Description/Modern Arabic Literature

1- Course name

Modern Arabic Literature / Fourth Stage

2-Course code

3-Semester/Year

2024

4- Date of preparation of this description

22/2/2024

5- Available forms of attendance

Mandatory attendance

6-Number of study hours (total) / Number of units (total)

Hours: (84) / Units (168)

7- Name of the course administrator

Name: Assistant Professor Dr. Abdul Rahman Khalaf Mutalib

Email: dr.abdalrahman.aljumaily@imamaladham.edu.iq

8- Course objectives

Course objectives:

- That the student knows the stages that modern Arabic literature has gone through, and the changes that have occurred in literature in the styles of poetry in terms of words and meanings, and that he is familiar with them, and that he is informed about the poets, writers and critics of the modern era, and what they have brought.
- The student should know the new literary purposes and arts that were created or introduced into Arabic literature.
- That the student becomes familiar with the sources of Arabic literature in general and

modern literature in particular.

- To be able to compare between ancient and modern Arabic literature and diagnose the strengths and weaknesses of each.
- Helping him stand up to Western literature, its atheistic philosophies, and intellectual invasion in general, and confronting the enemies of the Muslim nation, who are lurking in the dark about it.

9-Teaching and learning strategies

Strategy: Working on refining students' minds, developing their skills and directing them in an academic and scientific manner based on developing a positive spirit by enhancing confidence in individual and collective skills through scientific means directed towards students through scientific participation and skill activities through seminars and discussion groups and attending discussions to benefit from the experiences of seniors, and working on achieving academic and scientific goals and clarifying them to students, in addition to using learning methods for clarification, for example: the blackboard and urging students to visit libraries and how to access information in a short time.
